Valid Employment Authorization Document

Core Pursuit: *Blend technology for everyday solutions*

CS and AI, **Purdue University** 2026, GPA: 3.46

Experience

- **DevRev** — Palo Alto, CA
  AI Intern — *May 2025 - Present*
  - **LLM Gateway Enforcement**: Engineered chat completion support and rejection rules at the gateway level using Go, reducing latency, enforcing usage restrictions, and preventing abuse of public-facing endpoints.
  - **Usage Analytics and Rate Controls**: Developed token/model-level tracers and interceptors on LangChain, Python, and Go services to normalize provider usage, aggregate token data, and generate detailed analytics, enabling usage-driven business insights and fair rate limiting.
  - **LLM Proxy for Global Policy Control**: Designing a provider-agnostic proxy to centralize routing, enforce compliance policies, and manage rate limits across geographic regions, supporting global data residency rules and pricing strategy across cloud providers.
- **Chariot Command** — West Lafayette, IN
  Software Developer — *Aug 2024 – May 2025*
  - **Thermal Monitoring System**: Engineered a PyQt5 and OpenCV interface to process FLIR thermal and RGB streams, extracting pixel intensity data for region specific temperature tracking and threshold-based alerting.
  - **Multi-Camera Playback System**: Built a multi-threaded playback engine to support 8 sensor units, enabling synchronized logging, diagnostics, and historical navigation with session-aware configuration; finalized the MVP.
- **Krafton Inc. (PUBG Corporation)** — Madison, WI
  Deep Learning Intern — *Jun 2024 - Aug 2024*
  - **Text Clustering for Feature Upgrades**: Adapted team's image clustering research into an LLM-based framework that achieved 96% clustering accuracy on validation data, powering a recommendation system driven by YouTube comments and live chat to prioritize product feature updates based on community demand.
  - **Minsimi - AI-Powered Feedback Slackbot**: Integrated the recommendation system into a conversational Slackbot that delivered insights from 100+ YouTube and stream channels, surfacing real-time community sentiment and trending topics to help product teams identify pain points and guide gameplay improvements.
- **Saama Technologies** — Campbell, CA
  Software Engineering Intern — *May 2023 - Aug 2023*
  - **Clinical Setup Automation**: Automated the clinical trial data preparation process by developing modular SQL scripts that eliminated manual setup steps, streamlining the development and testing pipeline for research teams.
  - **Cross-System Data Analysis with Data Hub**: Executed clinical trial data ingestion, processing, and result analysis using Saama's Data Hub platform to centralize clinical and operational datasets across research systems.
- **Early Technical Internships** — New Delhi, India
  Engineering Internships at Infeedo and Fintso — *May 2020 – Aug 2021*
  - **Infeedo (2020)**: Wrote SQL scripts in a SCRUM environment to assist with QA and data integration tasks.
  - **Fintso (2021)**: Gained exposure to AWS and DevOps, wrote and tested lambda functions.

Education

- **Purdue University** — West Lafayette, IN
  B.S. in in Computer Science & Artificial Intelligence; GPA: 3.46 — *Aug 2022 - May 2026*
  - **Recognition**: Dean's List and Semester Honors (Fall 2022, Spring 2023 and Fall 2023)
  - **Key Courses Completed/ In Progress**: CS 577 - Natural Language Processing, CS 373 - Data mining and Machine Learning, CS 381 - Advanced Analysis of Algorithms, CS 251 - Data Structures and Algorithms
  - **Teaching Assistant for Object Oriented Programming in Java**: 60 students each for 3 semesters.
  - **Department of Computer Science Ambassador**: Providing comprehensive academic guidance to current CS students, addressing their educational needs and career aspirations, including hosting focused events with faculty.
  - **Guest Center Tour Guide as Alumni Committee Lead**: Tours for prospective students and VIP alumni.

Skills

- **Languages**: Python, Java, C, R, SQL — **Soft**: Design Thinking, Technical Writing, Collaboration
- **Stacks**: AWS, Git, Postgres, Docker, PyTorch, LangChain, REST/gRPC
