Experience

INFEEDO INC. | QA and Engineering Intern

5 Months | May 2020 – September 2020 | New Delhi, India

- Worked in the backend engineering unit as a Quality Assurance Intern, debugging and optimising performance of applications for full-scale production deployments.
- Learnt Node, Git and SQL, along with quality assurance and workflow management for the AI and chatbot based business model that Infeedo has.
- Individually worked on database handling, implementing both data manipulation (DML) and query language (DQL).

FINTSO | Backend Engineering Intern

5 Months | May 2021 – September 2021 | New Delhi, India

- Understood the versatility of 'technology as a product' but in a financial services firm, with exposure to advanced programming and data management skills.
- Worked on the back-end engineering side, directly under the tech lead, and founding member of Fintso, looking into customer fit, experience, and integration of tech platform with the financial-advisor-customers.
- Got exposure to date lake, data mining and seeding insights via data, to be used post validation, for new products and or micro-targeted sales.

HEAD OF SOCIAL INITIATIVES | Student Council

December 2020 – March 2022

- Elected as Head during the pandemic, brought the focus online, built website and helped students continue their projects virtually.
- Aimed a improving mental health, deployed an online tool for surveying the happiness quotient and providing resources. Done in over 10 schools in the region.
